

27.05.2014

Come and see us at PLASTPOL 2014

Today, May 27th, saw the opening of the 18th PLASTPOL International Plastics and Rubber Processing Fair, one of Europe's largest trade events in the industry.

This year's edition, continuing to May 30th, has more than 500 exhibitors, including Grupa Azoty.

PLASTPOL 2014, the latest in a series of trade fairs held in Kielce for many years, features exhibitors from more than 30 different countries with the latest technology in plastics processing machines and equipment, moulds and tools, components and plastics, and even entire production lines with IT solutions for the chemical industry.

Grupa Azoty, Poland's largest chemical company, will be one of the exhibitors at this year's fair. Our representatives will be there to demonstrate the full range of the construction plastics manufactured by our Tarnów plant, such as Tarnamid®, Tarnoform® and their modified forms, as well as Tytanpol® from the Police plant. They will also offer advice and further information on the design, choice and application of the plastics. As ever, visitors to the Grupa Azoty stand can count on professional service and attractive surroundings, and can meet Poland's finest athletes from disciplines such as ski jumping, speedway, volleyball and rally driving.
