Grupa Azoty as strategic partner of Argus Fertilizer East Europe conference

On June 21st to June 23rd, the Intercontinental hotel in Warsaw will play host to Argus Fertilizer East Europe, one of the largest fertilizer and chemical conferences in Central and Eastern Europe. Grupa Azoty's management personnel and agronomy managers will play a key role in the event that brings together representatives of the largest fertilizer and chemical producers in our region. On the first day of the conference, participants will have the opportunity to visit production plants of a Grupa Azoty Group company, Grupa Azoty Puławy.

Grupa Azoty is the Strategic Partner of the conference this year. The opening speech during the event will be delivered by dr Grzegorz Kądziałowski, Vice President of the Management Board. The speakers and panellists will include dr hab. Monika Tabak, Agronomy Manager, who will talk about the various aspects of using urea with inhibitors, and Henryk Kubiczek, Head of the Strategy and Development Department, who will take part in a panel on green technology and energy.

As food demand and gas prices rise, fertilizers have become the centre of attention in the global agricultural production chain. Europe is facing the challenges presented by the European Green Deal, and its next task is to initiate the phase of sustainable fertilizer and chemical production. The technology and legislative revolutions are other issues the industry is preoccupied with.

All those topics will be discussed by industry experts and representatives of leading CEE fertilizer and chemical producers during the annual conference organised by Argus Fertilizer. The three-day event that brings the fertilizer community together in one place will feature a series of discussions on how to stay competitive and gain strategic insights into the future of Eastern European markets. During panel discussions, participants will be provided with key information on current issues, innovation trajectories and expert opinions, and will also have the opportunity to meet and talk to industry experts.

The event's agenda is available at the following [link](#).
