Grupa Azoty S.A. with new Management Systems Certificates

We are pleased to announce that following a series of successful external audits carried out by DNV GL Business Assurance Poland Sp. z o.o., an accredited certification provider, Grupa Azoty S.A. has obtained Management Systems Certificates confirming its compliance with the requirements of the amended standards ISO 9001:2015 and ISO 14001:2015.

The Certificates are:

- Management System Certificate confirming that Grupa Azoty S.A.'s Quality Management System complies with the requirements of ISO 9001:2015;
- Management System Certificate confirming that Grupa Azoty S.A.'s Environmental Management System complies with the requirements of ISO 14001:2015.

The certificates cover the production and sale of nitrogen fertilizers, plastics, plastic products, catalysts, organic and inorganic chemicals, heat and electricity. They also cover R&D and laboratory services, design and development of chemical products and plastics, as well as oversight of joint operations of the Grupa Azoty Group companies.

The certificates demonstrate that Grupa Azoty S.A. has effectively adapted its requirements and procedures to the ISO 9001 and ISO 14001 standards amended in 2015. These measures were taken systematically and involved, on the one hand, making the organisation aware of the need for change and understanding the changes and, on the other hand, gradual implementation of the requirements for use. The positive results of the audit and the Certificates obtained are a recognition of many people's involvement in that process.

The Certificates are valid until June 14th 2020.
