These interim condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 *Interim Financial Reporting* and the Minister of Finance's Regulation on current and periodic information to be published by issuers of securities and conditions for recognition as equivalent of information whose disclosure is required under the laws of a non-member state, dated February 19th 2009 (consolidated text: Dz.U. of 2014, item 133, as amended).

These interim condensed consolidated financial statements of the Group cover the six months ended June 30th 2017 and contain comparative data for the six months ended June 30th 2016 and as at December 31st 2016.

These interim condensed consolidated financial statements of the Group for the six months ended June 30th 2017 were authorised for issue by the Management Board on August 22nd 2017.

Interim condensed consolidated financial statements do not include all the information and disclosures required in full-year financial statements and should be read in conjunction with the consolidated financial statements of the Group for the year ended December 31st 2016, which were authorised for issue on April 26th 2017.

The Company's interim financial results may not be indicative of its potential full-year financial results.

All amounts in these interim condensed consolidated financial statements are presented in thousands of zloty.

These interim condensed consolidated financial statements have been prepared on the assumption that the Group companies will continue as going concerns in the foreseeable future. As at the date of authorisation of these financial statements for issue, no circumstances were identified which would indicate any threat to the Group companies continuing as a going concerns.

2.2. Changes in presentation of financial statements and correction of errors

a) Changes in International Financial Reporting Standards

The accounting policies applied to prepare these interim condensed consolidated financial statements are consistent with the policies applied to draw up the Group's full-year consolidated financial statements for the year beginning on January 1st 2016. After January 1st 2016, no new or amended standards or interpretations were published that would be effective for annual periods beginning on or after January 1st 2016. The standards and interpretations which have been issued but are not yet effective as they have not yet been endorsed by the European Union or have been endorsed by the European Union but have not been early adopted by the Group, were presented by the Group in its financial statements for 2016. Only the following two standards were issued in the first half of 2017: IFRS 17 *Insurance Contracts* and IFRIC 23 *Uncertainty over Income Tax Treatments*.

The Group has not elected to early adopt any of the standards, interpretations or amendments that have been published but are not yet effective in accordance with the European Union regulations.

At the date of authorisation of these interim condensed consolidated financial statements for issue, the parent's Management Board had not completed its assessment of the impact of the new standards and interpretations on the accounting policies applied by the Group with respect to its operations or financial results.

b) Correction of prior period errors and changes in presentation of financial statements

In the reporting period the prior period errors were corrected and the presentation of financial statements was changed to improve the disclosure of information on the effect of certain transactions on the Company's assets and financial position. The comparative data was restated accordingly.

The table below presents the impact of the changes on the consolidated statement of financial position:

- Change 1 - revaluation of the exploration and evaluation assets of African Investment Group S.A., of XOF 4,241,955 thousand (the equivalent of PLN 28,421 thousand) Following analyses of the documentation held by the subsidiary, it was found that no clear relationship could be established between the expenditure incurred and discovery of any specific mineral resources, therefore the expenditure could not be accounted for in the initial value of exploration and evaluation assets. Therefore, it was found that this expenditure had not generated and would not generate in the future any economic benefits. At the same time, in view of the information available in December 2016, including that potential abuses relating to this area were reported to the prosecutor's office, the parent's Management Board found that the revaluation should be reflected already in the 2016 results;
- Change 2 - Adjustment of overstated provision for bonuses;
- Change 3 - Adjustment related to the recognition of an expense and a liability to reflect the signing of a deed of incorporation of the Polish National Foundation, under which the parent is required to co-fund the Foundation's operations for ten years from 2017;
- Change 4 - Change in the presentation of investments in subordinates and available-for-sale investments;
- Change 5 - Consolidation of Supra Agrochemia Sp. z o.o., which was already controlled by the parent in previous years;
- Change 6 - following an analysis of the intangible assets recognised on acquisition of control of Grupa Azoty Zakłady Chemiczne Police ("ZCh Police") it was found that the corporate brand which was then recognised with a specific value for the most part represented economic benefits arising from other, not separately identifiable assets, acquired as part of the acquisition of ZCh Police, which in essence met the definition of goodwill as provided in IAS 38.

c) Judgements and estimates

The preparation of these interim condensed consolidated financial statements requires the Management Board to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and underlying assumptions are based on historical experience and other factors reasonable in the circumstances and are the basis for determining the net carrying amounts of assets and liabilities that do not result directly from other sources. Actual results may differ from the estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Changes to accounting estimates are recognised in the period in which the estimates are revised or in the current and any future periods affected.

The key judgements and estimates made by the Management Board in preparing these interim condensed consolidated financial statements were the same as those made in preparing the consolidated financial statements for the financial year ended December 31st 2016.

Segment reporting

Operating segments

The Grupa Azoty Group's business is carried out through four main reportable segments, each with a separate management strategy for production, sales, and marketing.

The following summary describes the operations of each of the Group's reportable segments:

- The Agro Fertilizers segment comprises the manufacturing and marketing of the following products:
 - Nitrogen fertilizers (Saeletrzak 27 Standard (calcium ammonium nitrate), Saeletrzak , Salmag®, Saeletrzak z borem (with boron) 27+B Standard, Salmag z borem®, ZAKsan® (Kędzierzyńska Saeletra Amonowa (Kędzierzyn ammonium nitrate)), Saeletra Amonowa 30 Makro, mocznik.pl® (urea), 46% granulated urea, PULGRAN®, PULAN®, RSM®, PULREA®),

- Nitrogen-sulfur fertilizers (ammonium sulfate AS21, Saletrosan®30 (ammonium sulfate nitrate), Saletrosan® 26, POLIFOSKA® 21, Salmag z siarką®, Pulgran®S, Pulsar®, Pulaska®, RSM®S),
- Compound fertilizers (POLIFOSKA® 4, POLIFOSKA® 5, POLIFOSKA® 6, POLIFOSKA® 8, POLIFOSKA® 12, POLIFOSKA® M, POLIFOSKA® TYTAN, POLIFOSKA® START, POLIFOSKA® Petroplon, POLIMAG® S, POLIFOSKA®PLUS, Amofoska® NPK 5-10-25 +0,1B, Amofoska® NPK 4-16-18, Amofoska® NPK 4-10-28 +2,5Mg+0,1B, Amofoska® NPK 4-12-20, Amofoska® NPKMg 4-12-12+2,5, Amofoska® NPK 4-14-32, Amofoska® Corn NPK 4-10-22 +2,5Mg+0,2Zn),
- Nitrogen-phosphorus and phosphorus fertilizers (POLIDAP® TYTAN, POLIDAP®, POLIDAP® light, Super FOS DAR 40™),
- Ammonia,
- Technical-grade and concentrated nitric acid,
- Industrial gases.
- The Plastics segment comprises the manufacturing and marketing of the following products:
 - Tarnamid® (PA6) and its modifications,
 - Tarnoform® (POM) and its modifications,
 - Alphalon™ (PA6),
 - Tarnoprop C and H (PPC, modified PPH),
 - Tarnodur A (modified PBT),
 - Tarnamid® A (modified PA66),
 - Caprolactam,
 - Polyamide 11 and 12 tubes, polyethylene tubes, polyamide 6 tubes,
 - Standard Ż polyamide casings.
- The Chemicals segment comprises the manufacturing and marketing of the following products:
 - Oxo alcohols (2-ethylhexanol, N-butanol, Isobutanol and Oktanol F),
 - Plasticizers (Oxoplast® O, Oxoviflex®, Oxoplast Medica® and Oxoplast® PH),
 - Titanium white (Tytanpol®),
 - Melamine,
 - Iron II sulfate (Fespol®),
 - Urea- and ammonia-based special solutions, including: water solution of urea (Noxy®), water solution of urea with a 35%, 40% and 45% urea content (PULNOx®), ammonia water (LIKAM®).
- The Energy segment comprises the production of electricity and heat for the purposes of chemical installations and contract-based sale of electricity to customers connected to the power network.
- The Other Activities segment comprises the remaining activities, including laboratory services, catalyst production (iron-chromium catalyst, copper catalysts, iron catalysts), rental of real estate, and other activities which cannot be allocated to any of the segments specified above. None of those activities met the quantitative criteria to be identified as a reportable segment in 2017 and 2016.

Key financial results and performance of each of the segments are discussed below. Key performance metrics for each segment are revenue, EBIT and EBITDA.

The internal management reports of each segment are reviewed by the Management Board on a monthly basis.

For its internal purposes, Grupa Azoty prepares and uses management information focusing on the following operating segments:

- Nitrogen fertilizers,
- Compound fertilizers,
- Plastics,
- OXO alcohols,
- Melamine,
- Pigments,
- Chemicals,
- Mineral extraction,
- Energy,
- Other.

This structure reflects business areas managed from the perspective of the Group's principal companies. The areas were identified based on the key core business areas which make it possible -

through diversification of the product portfolio – to mitigate market and economic cycle risks, thus maximising profits and cash flows. The division was made based on the following parameters:

- Target market (B2B or B2C segments), including with respect to industries and, ultimately, customers,
- Nature of the product and its final use (consumption or further processing),
- Nature of the manufacturing process and production lines, including extension of the value chain.

For the purposes of reportable segments, the Group has aggregated the operating segments based on the following business and formal rationale.

Business rationale (sales- and production-related)

- Agro Fertilizers: aggregation of nitrogen fertilizers and compound fertilizers as well as the mineral extraction area (phosphate rock). Rationale:
 - Common sales policy (pricing, marketing) dedicated to the markets for products based on nitrogen (N), sulfur (S), phosphorus (P), potassium chloride (K) and their mixtures,
 - Management of Group-wide manufacturing process taking into account the use of key intermediate products (ammonia/urea);
- Plastics: end-to-end use of the Benzene/Phenol - Caprolactam - Polyamide value chain by individual Group companies;
- Chemicals: aggregation of the melamine, chemicals, pigments, OXO, mineral extraction (sulfur) areas as intermediate products for a broad range of applications in the chemical sector for their further processing into finished products;
- Energy: similar nature of the manufacturing process, the product and its use at individual Group companies.

Formal rationale (IFRS 8 guidelines)

- Chemicals: aggregation of the chemical operations: melamine, chemicals, pigments, OXO, mineral extraction (sulfur), partly because none of the segments separately meets the quantitative thresholds set out in IFRS 8;
- Energy: as a support segment with significant quantitative parameters.

Other rationale:

- Other Activities, supporting the core business and/or focusing on non-core business areas.

The decrease in selling and distribution expenses resulted from higher volumes of sales by the Group's key companies and the absence of selling and distribution expenses at African Investment Group S.A. (down from PLN 19,104 thousand in the comparative period to PLN 0 in the first half of 2017). The upward trend seen in revenue deviates from the trend followed by the selling and distribution expenses as the former is price-driven, as reflected most clearly in the results of the Plastics segment.

The downward trend in administrative expenses is the effect of the previous year's higher base, which included severance pays for the previous Management Board members, as well as of the reduction of expenditure on advisory and legal services which currently are performed using in-house resources.

Impairment losses on property, plant and equipment of PLN 24,916 thousand represent the largest item of other expenses. The impairment losses include a PLN 14.7m write-down of the carrying amount of the fats processing plant at Zakłady Azotowe Chorzów S.A. (recognised due to limited production capacity utilization and persisting low selling prices for the plant's products) and a PLN 9m write-down of capitalised expenditure (impairment of property, plant and equipment) incurred by the Group on a CCGT project, which was recognised after a decision was made to abandon the tender process without selecting the winning bid.

The loss on disposal of property, plant and equipment is attributable to the fact that the net carrying amount of liquidated and sold tangible assets (including catalysts) was higher than proceeds from the sale and physical liquidation of the assets.

The effective tax rate of 14.8% for the period from January 1st to June 30th 2017 reflects mainly an asset recognised by the parent in respect of benefits it can derive from operations in the Special Economic Zone (in connection with the project involving construction of Polyamide Plant II, the parent obtained a licence to operate in the Krakowski Park Technologiczny Special Economic Zone), the asset being equal to the forecast tax savings on the operations in 2017-2020, i.e. PLN 32,655 thousand. As at June 30th 2017, the parent's eligible capital expenditure totalled PLN 261,142 thousand, which in the future may allow the parent to realise tax savings on operations in the zone of approx. PLN 130 million (net of the discount effect).

In connection with the project involving construction of Polyamide Plant II, the parent obtained a licence to operate in the Krakowski Park Technologiczny Special Economic Zone. As at June 30th 2017, the Company recognised for the first time an asset in respect of benefits it can derive from operations in the Special Economic Zone, the asset being equal to the forecast tax savings on the operations in 2017-2020, i.e. PLN 32,655 thousand. As at June 30th 2017, the Company's eligible capital expenditure totalled PLN 261,142 thousand, which in the future may allow the Company to realise tax savings on operations in the zone of approx. PLN 130 million (net of the discount effect).

The decrease in the deferred tax liability on temporary differences relating to non-current assets results from the reduction, as of the start of 2017, of tax depreciation rates applicable to property, plant and equipment at the parent. The decrease in deferred tax asset on unused tax losses is a consequence of a settlement of the losses by the parent in the first half of 2017.

Note 8 Earnings per share⁸

Basic earnings per share were calculated based on the net profit attributable to equity holders of the parent and the weighted average number of shares outstanding in the reporting period. The amounts were determined as follows:

	for the period Jan 1 – Jun 30 2017	for the period Jan 1– Jun 30 2016	for the period Apr 1– Jun 30 2017	for the period Apr 1– Jun 30 2016

Items classified as other provisions include provisions for future obligations related to anticipated fines and compensations due for damage to property, as well as provisions for costs related to removal and disposal of waste.

The decrease in other provisions in the first six months of 2017 was attributable to a settlement was made with a counterparty concerning the amount due for technical consultancy services related to phosphate rock supplies from Senegal. In connection with the settlement, PLN 4,701 thousand of the provision amount was reversed, while the remainder of the provision, of PLN 4,710 thousand, was used.

Note 15 Other material changes in items of the statement of financial position

The PLN 94,866 thousand increase in inventories relative to December 31st 2016 was mainly attributable to higher cost of production inputs (in connection with the technological start-up of new installations) and recognition of inventories of finished products (fertilizers for the following season).

The PLN 289,846 thousand decrease in other financial assets was related to termination of term deposits on maturity.

The PLN 6,713 thousand increase in financial derivatives was due to the positive fair value of open forward contracts.

The PLN 178,341 thousand increase in receivables, in particular trade receivables, was attributable to longer periods of collection of payments for fertilizers sold off-season.

The PLN 2,457 thousand increase in non-current assets available for sale was a consequence of recognition of all assets of Supra Agrochemia Sp. z o.o. in this item.

The PLN 38,071 thousand decrease in other current financial liabilities was related a lower amount of receivables sold as at June 30th 2017 compared with December 31st 2016 (the item includes Grupa Azoty ATT Polymers GmbH's liabilities arising in connection with the company's receivables discounting arrangement with mBank, including due to a surplus of foreign currencies in the Company's account).

The PLN 247,626 thousand decrease in liabilities, including in particular in trade payables, was due to the scheduled plant shutdowns for repairs and maintenance work in June (and planned for July), which resulted in lower consumption of natural gas.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Group is exposed to credit risk principally in connection with its trade receivables, short-term bank deposits, bank accounts and cash pooling.

The following table presents Grupa Azoty's maximum exposure to credit risk:

	as at Jun 30 2017	as at Dec 31 2016 (restated)
	<i>unaudited</i>	<i>audited</i>
Assets at fair value through profit or loss	15,148	8,435

Past due more than 360 days	3,230	1,711
	47,429	47,052

The Group's trade receivables are insured in the first place under trade credit insurance policies, which limit the credit risk to the amount of deductible (5% to 10% of the value of insured receivables). The policies ensure that customers' financial condition is monitored on an ongoing basis and enable debt recovery when required. Upon a customer's actual or legal insolvency, the Group receives compensation equal to 90-95% of the amount of the insured receivables.

Most of the Group's other trade receivables from unrelated entities are secured with letters of credit, guarantees or other forms of security acceptable to the Group.

Trade credit limit is granted first of all on the basis of the insurance company's decision, but also taking into account positive trading history with the customer and the customer's creditworthiness (assessed based on business intelligence reports), financial statements and payment history.

If there is no positive history of trading between the Group and a customer, or where transactions are occasional and the credit limit cannot be insured, the customer is required to make a prepayment or provide collateral prior to delivery.

Credit risk exposure is defined as the total of unpaid receivables, monitored on an ongoing basis by the Group's internal financial staff (individually for each trading partner) and, if a receivable is insured, also by insurance companies' credit analysts.

Fair value of financial instruments

Detailed information on the fair value of financial instruments whose fair values can be estimated is presented below:

- Cash and cash equivalents, short-term bank deposits and short-term bank borrowings. Carrying amounts of these instruments approximate their fair values because of their short maturities.
- Trade and other receivables, trade payables. Carrying amounts of these instruments approximate their fair values due to their short-term nature.
- Long-term variable-rate borrowings. Carrying amounts of these instruments approximate their fair values due to the variable nature of their interest rates.
- Long-term fixed-rate borrowings. Carrying amount of these instruments is PLN 536,825 thousand, and their fair value is approximately PLN 541,644 thousand (Level 2 in the fair value hierarchy).
- FX derivatives and emission allowance derivatives. Carrying amounts of these instruments are equal to their fair values.

- Financial assets available for sale. Carrying amounts of these instruments are equal to their fair values.

The table below presents financial instruments carried at fair value, by levels in the fair value hierarchy as at June 30th 2017:

Hierarchy level (unaudited)	Level 1	Level 2	Level 3
Financial assets at fair value, including:			
shares classified as held for sale	-	-	303
currency futures and forward contracts	-	13,850	-
contracts for purchase of CO ₂ emission allowances	-	1,273	-
	-	15,123	303
Financial liabilities at fair value, including:			
contracts for purchase of CO ₂ emission allowances	-	(2,244)	-
	-	(2,244)	-

The table below presents financial instruments, carried at fair value, by levels in the fair value hierarchy as at December 31st 2016:

Hierarchy level (audited, restated)	Level 1	Level 2	Level 3
Financial assets at fair value, including:			
shares classified as held for sale	-	-	318
currency futures and forward contracts	-	1,010	-
contracts for purchase of CO ₂ emission allowances	-	7,425	-
	-	8,435	318
Financial liabilities at fair value, including:			
currency futures and forward contracts	-	(7,130)	-
contracts for purchase of CO ₂ emission allowances	-	(1,083)	-
	-	(8,213)	-

The fair value hierarchy presented in the tables above is as follows:

Level 1 - price quoted in an active market for the same asset or liability,

Level 2 - values based on inputs other than quoted level 1 prices that are either directly or indirectly observable or determined on the basis of market data,

Level 3 - values based on input data that are not based on observable market data.

The fair value of foreign currency contracts and forwarding rights presented in Level 2 is determined on the basis of a valuation carried out by brokers or banks with which the relevant contracts have been concluded. The valuations are verified by discounting the expected cash flows from the contracts at market interest rates effective as at the reporting date.

The Group carries an investment of PLN 303 thousand (December 31st 2016: PLN 318 thousand) in shares that are classified under Level 3 as they are not quoted on an active market and there were no transactions in the shares. The fair value of the shares was estimated by an expert using valuation techniques containing significant unobservable inputs, i.e. projected cash flows and discount rates.

Derivative instruments and hedge accounting

Foreign currency derivatives

As at June 30th 2017, the notional amount of the Group's open currency derivatives (forwards) totalled EUR 59.5m (which included instruments maturing in the second half of 2017: July - EUR 11.3m, August - EUR 9.7m, September - EUR 9.7m, October - EUR 8.8m, November - EUR 9.5m and December - EUR 4m; and instruments maturing in 2018: February - EUR 1.5m, March - EUR 2.0m, April - EUR 1.0m, May - EUR 1.0m and June - EUR 1.0m) and USD 6.9m (which included instruments maturing in H2 2017: July - USD 0.6m, August - USD 0.8m, September - USD 1.3m, October - USD 1.9m, November - USD 2.3m).

As at December 31st 2016, the notional amount of the Group's open currency derivatives (forwards) was EUR 110.4m and USD 34.4m.

The contracts are concluded exclusively with creditworthy banks under framework agreements. All concluded contracts are reflected in actual cash flows in foreign currencies. FX forwards and derivative contracts are executed to match the Company's currency exposure and their purpose is to limit the effect of exchange rate fluctuations on the Company's financial performance.

Hedge accounting

The Group applies cash flow hedge accounting. The hedged items are highly probable future proceeds from sale transactions in the euro, which will be recognised in profit or loss in the period from December 2018 to June 2025. The hedging covers currency risk. The hedge is a euro-denominated credit facility of EUR 127,134 thousand as at June 30th 2017, repayable from December 2018 to June 2025 in 14 equal half-yearly instalments of EUR 9,081 thousand each. As at June 30th 2017, the fair value of the facility was PLN 541,644 thousand. As at June 30th 2017, the hedging reserve included PLN 11,953 thousand on account of the effective hedge. In the first half of 2017, the Group did not reclassify any hedge accounting amounts from other comprehensive income to the statement of profit or loss.

- August 23rd 2017 as the dividend payment date.

On May 29th 2017, the Company's Supervisory Board issued a positive opinion on the Management Board's proposal to the Annual General Meeting that the 2016 net profit of PLN 224,775,178.67 be allocated as proposed in the Management Board's resolution of May 25th 2017.

On June 30th 2017, the Annual General Meeting passed a resolution to distribute the dividend for 2016 in the following manner:

- The amount allocated to dividend payments is PLN 78,364,432.36;
 - Dividend per share is PLN 0.79;
 - Dividend is paid on all Company shares (99,195,484 shares);
 - Dividend record date is August 4th 2017;
- Dividend payment date is August 23rd 2017.

3.4. Seasonality of operations

Seasonality of operations is seen mainly in the markets for mineral fertilizers.

Mineral fertilizers

Each calendar year, the first six months is a period of increased activity in the agricultural sector, preceded by demand for agricultural materials (including mineral fertilizers). The Grupa Azoty Group follows a policy of mitigating seasonality through optimum volume allocation in all-year supplies to the distribution network and partially by placing products on geographical markets with different seasonality patterns.

Titanium white

Because of its chief application (as a component of paints and varnishes), titanium white is a seasonal product used in structural construction. The demand for titanium white depends on the situation on the application markets, especially the construction market. It usually starts to rise at the end of the first quarter and falls as the construction season ends.

In the case of other Grupa Azoty Group's products, seasonality does not have a material effect on the Group's results as they represent a small proportion of total output.

These interim condensed consolidated financial statements for the six months ended June 30th 2017 contain 49 pages.
